

Spirit of Nature

The Spirit of Nature range retains all of the 'style with comfort' synonymous with the Josef Seibel brand but now allows environmental consideration to also be taken into the purchasing decision. Feature units from the range incorporate leather uppers in attractive colour combinations.

In addition the collection offers:

- Recycled active carbon footbeds which are breathable and anti bacterial
- 80% of upper leathers and linings are Chrome free tanned
- An outsole made of either:
 - A rubber and natural cork mix incorporating 14% renewable primary products
 - or
 - CFC and lead free polyurethane
- The use of handstitching that is prominent in our ranges lessens the reliance on adhesive based constructions and therefore the use of adhesives.
- Products are developed in Germany and produced in Europe, lowering their carbon footprint
